PRO**VECTA**[®]
PLUS

ALL IN WEB Technology

Innovative ALL IN WEB technology creates a three-dimensional structure resembling a spider's web that physically immobilises insects. Thanks to this mechanism, it is possible to combine an immediate effect with safe use in the home environment.

KEY TREATMENT AREAS

Apply the product to areas where bed bugs are most likely to hide.

mattresses
(seams, piping, folds)

bed frames
and bed bases

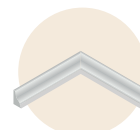

upholstered
furniture

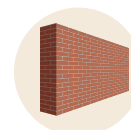

luggage
after travel

joints and
crevices in
furniture

skirting
boards

cracks
in walls

HOW TO USE:

Precise application, spot by spot.
Exactly where bed bugs are hiding.

IDENTIFY the areas where bed bugs are most likely to hide: mattress seams and folds, bed frames, upholstered furniture, gaps in furniture, skirting boards, cracks in walls, and luggage after travel.

APPLY a thin layer of the product
along seams, mattress joins, and into gaps.

REPEAT the
treatment as needed.
